

The quotation against the itinerary in the system

The nine services quoted in COT-2026-0160, one by one, against what is loaded today in the Tourevo system and already reviewed with Segar. What matches, what moves day, what changes time and what is missing.

Ref. COT-2026-0160

Programme 22 - 26 Dec 2026

Travellers 4

THE NINE SERVICES, BY TYPE OF DIFFERENCE

Eight of the nine are in the system. None matches the quotation on both day and time: two move day, four change time, two only now have a time, and one is missing.

TIME NOW SET CLP 60,000 2 of 9 services	TIME CHANGES CLP 498,500 4 of 9 services	MOVES DAY CLP 150,000 2 of 9 services	MISSING CLP 101,000 1 of 9 services
---	--	---	---

WHAT IS ALREADY SETTLED

Two things I flagged last time against the export are already fixed in the system: the **acclimatization** now sits on Wednesday 23 rather than the 22nd, so it no longer clashes with the 19:15 arrival; and **Rainbow Valley** has come out of the Piedras Rojas day, which was the combination that could not be operated. Puritama was not missing either: it is on the 24th. None of that needs touching again.

SERVICE BY SERVICE

SERVICE	QUOTED	TOUREVO SYSTEM	DIFFERENCE
Arrival transfer · El Loa Airport → San Pedro	Tue 22 Dec Time to be confirmed	Tue 22 Dec 18:15 - 19:15	TIME NOW SET
Same day. The system fills in the time the quotation had left open: arrival in San Pedro 19:15, check-in 19:35. Nothing else fits on the 22nd, and the system does not try: it is a full travel day from Puerto Natales.			
Puritama Hot Springs	Wed 23 Dec 09:30 - 13:30	Thu 24 Dec 09:30 - 13:30	MOVES DAY
The time is identical; the day moves by one. The system notes Puritama at 3,500 m, and moving it to the 24th leaves the 23rd to acclimatize in San Pedro at 2,400 m before climbing, with Miscanti above 4,000 m on the 25th. Read that way the change is deliberate and well judged — but it leaves the 24th with five blocks. See conflict 1.			

SERVICE	QUOTED	TOUREVO SYSTEM	DIFFERENCE
Valle de la Luna South	Wed 23 Dec 16:30 - 20:30	Wed 23 Dec 17:30 - 20:45	TIME CHANGES
Same day, an hour later and fifteen minutes longer. Worth confirming the quoted route — the off-circuit through El Vallecito, which is walked — fits that window. The standard circuit does, but it is a different product and far busier.			
Astronomy tour	Wed 23 Dec 21:00 - 23:00 · shared	Thu 24 Dec 22:15 - 23:59 · private	MOVES DAY
Moves from the 23rd to the 24th, starts an hour and a quarter later, and goes from shared to private. What is quoted is the shared tour at CLP 40,000 per person, which we coordinate as a courtesy; private is a different product and has to be quoted. It also lands right on top of the Christmas Eve dinner. See conflict 2.			
Valle de Marte + Sandboarding	Thu 24 Dec 09:30 - 13:30 · 4 h	Thu 24 Dec 13:30 - 15:30 · 2 h	TIME CHANGES
Same day, but it moves from morning to afternoon and from four hours to two. The system leaves it as “sandboard or quad bikes”, undecided: sandboarding is quoted, quad bikes are not and we do not operate them. And at 13:30 it collides with Puritama. See conflict 1.			
Cejar Lagoon + Ojos de Tebenquiche + Tebenquiche Lagoon	Thu 24 Dec 15:30 - 19:30	—	NOT IN THE SYSTEM
The only quoted service missing from the system. In its place the 24th has a “Free afternoon” from 15:30 to 17:30 — exactly where Cejar started, but two hours instead of four. And on the Valle de la Muerte line there is an unanswered message: they asked whether the walk can be combined with a float. That float is Cejar.			
Piedras Rojas + Tuyajto Lagoon + Altiplanic Lagoons + Proto-villages + Andean towns	Fri 25 Dec 10:00 - 18:00	Fri 25 Dec 08:00 - 18:00	TIME CHANGES
Same day, two hours longer: it starts at 08:00. The scope changed too — Chaxa comes in, with its own entrance fee, and Tuyajto and the proto-villages drop out. Rainbow Valley no longer appears: that one is settled.			
Archaeological tour · Pukará de Quito	Sat 26 Dec 08:00 - 10:00 · 2 h	Sat 26 Dec 08:30 - 10:00 · 1 h 30	TIME CHANGES
Same day, half an hour later and half an hour shorter. The guided visit is quoted at two hours: in ninety minutes the route has to be cut back. And the transfer to Calama leaves 24 minutes after it ends. See conflict 3.			
Departure transfer · San Pedro → El Loa Airport	Sat 26 Dec Time to be confirmed	Sat 26 Dec 10:24 - 11:44	TIME NOW SET
Same day and now with a time. It reaches Calama at 11:44 for the 13:44 flight: two hours of margin, fine for a domestic leg. The tight part is not the flight, it is getting away from Quito.			

TIMING CLASHES INSIDE THE SYSTEM ITSELF

Five points that do not depend on the quotation but on the itinerary as it stands today. The first two have to be resolved for the 24th to be operable.

1 The 24th: Puritama ends and Valle de la Muerte begins at the same time

Puritama runs **09:30 to 13:30** and Valle de la Muerte **13:30 to 15:30**. The hot springs are some 30 km from San Pedro, close to an hour on the road: you cannot finish there at 13:30 and be in the valley at 13:30.

Beyond the clash, it would be two hours of sandboarding or quad bikes in the hottest part of a December day, straight after four hours in hot springs.

What we propose: Move Valle de la Muerte into the free-afternoon slot, **15:30 to 17:30**. It resolves the clash, leaves real margin after Puritama and takes the quads out of the worst hour.

2 Cejar and Valle de la Muerte do not both fit on the 24th

Cejar is quoted **15:30 to 19:30**, four hours. If Valle de la Muerte moves into that slot to fix the previous clash, Cejar does not fit. And if Cejar stays where it was quoted, Valle de la Muerte has to go back to 13:30 and the clash returns.

The afternoon of **Wednesday 23** is the only gap where Cejar fits whole: the acclimatization ends at 13:00 and Valle de la Luna starts at 17:30. That is four and a half hours, just enough — you would have to leave as soon as the acclimatization ends. In its favour: Cejar sits at salt-flat level, so it does not undo the day's acclimatization.

What we propose: Decide first whether Cejar is in. If it is, the afternoon of the 23rd; if not, the 24th sorts itself out with Valle de la Muerte at 15:30. Before requoting it, check the **11 removed services** the system flags as restorable: Cejar may be among them.

3 The 24th: fifteen minutes between the Christmas Eve dinner and the astronomy

Dinner runs **20:00 to 22:00** and the private astronomy starts at **22:15**. Fifteen minutes to get up from the table and go. It is doable, but the operator has to know in advance.

What we propose: Set the pickup at the restaurant rather than the hotel, or close dinner at 21:30. And confirm the astronomy operates on the night of the 24th.

4 The 26th: twenty-four minutes between Quito and the transfer

Quito ends at **10:00** and the transfer to Calama leaves at **10:24**. In those 24 minutes you have to come back from the pukará, stop at the hotel, check out and load the luggage.

What we propose: Check out **before** heading to Quito and carry the luggage in the vehicle. The transfer then leaves straight from the pukará and 24 minutes is more than enough.

5 The 23rd has two blocks and the 24th has five

The 23rd is left with the morning acclimatization and Valle de la Luna at sunset. The 24th, which is Christmas Eve, piles up Puritama, Valle de la Muerte, the free afternoon, dinner and the astronomy.

The altitude progression justifies Puritama sitting on the 24th, so the imbalance is not fixed by moving it back. It is fixed by whatever moves into the afternoon of the 23rd.

What we propose: The afternoon of the 23rd is the only free space left in the whole programme. Cejar is the natural candidate.

WHAT THE SYSTEM HAS THAT THE QUOTATION DOES NOT COVER

- **Tue 22 Dec.** The whole leg down from Puerto Natales: transfer to PNT 06:35, PNT → Santiago 09:05, connection and lunch in Santiago 13:45, Santiago → Calama 15:33, and check-in in San Pedro 19:35. Of all that, the quotation only covers the Calama → San Pedro transfer.
- **Wed 23 Dec.** Acclimatization · calm morning in San Pedro, 09:00 – 13:00. We need to settle whether it is a guided service or simply free time: if it is guided, it needs quoting.
- **Thu 24 Dec.** Free afternoon 15:30 – 17:30 and Christmas Eve dinner 20:00 – 22:00.
- **Fri 25 Dec.** Dinner 20:00 – 21:30.
- **Sat 26 Dec.** Calama → Santiago flight 13:44, international check-in 20:00 and the Santiago → Dallas AA940 at 23:45, already purchased. Outside the scope of the quotation.

The system also flags **four unanswered messages** — one on Valle de la Luna, one on the Christmas Eve dinner and two on Valle de la Muerte — and **11 removed services** that can be restored.

WHAT I NEED CONFIRMED

1 Is Cejar in or out?

It is the only quoted service missing from the system, and there is a client message asking about a float. If it is in, the afternoon of the 23rd.

2 Sandboarding or quad bikes in the Valle de la Muerte?

The system leaves it undecided. Sandboarding is quoted; quad bikes are not, and we do not operate them.

3 Do we move Valle de la Muerte to 15:30?

It is what unblocks the 24th. It depends on what is decided about Cejar.

4 Is the private astronomy confirmed?

It changes the price against the shared tour that is quoted, and we need to confirm it runs on the night of the 24th.

5 Is the 17:30 Valle de la Luna on the 23rd the quoted route?

What is quoted is the off-circuit through El Vallecito, which is walked. The standard one also fits the window, but it is a different product.

6 Quitar in ninety minutes, or back to the two hours quoted?

In 1 h 30 the route has to be cut back. And it is worth checking out before leaving.

7 Does Chaxa go into the full day on the 25th?

It was not in the quotation and adds its own entrance fee. Tuyajto and the proto-villages drop out.

8 Is the acclimatization on the 23rd a guided service or free time?

If it is guided it needs quoting; if it is free time, it costs nothing.

9 Availability and holiday supplement for the 24th and 25th.

Christmas Eve and Christmas Day, with the programme's most expensive full day on the 25th. This is the first thing to close.

10 Is it 4 travellers?

The schedule says 4 on every line, but the dinner on the 25th is labelled "Segar & Shreya". The quotation is built on 4; worth confirming before requesting group rates.

With those answers I will close the programme and send the quotation aligned to the system.
