

Times we need confirmed

This is the itinerary we propose to run from 22 to 26 December. It is built on the one the client has already reviewed, so almost everything stays as it is: one excursion moves, the missing one is added, and a check-out block is inserted.

THE ONLY THINGS THAT MOVED: 3 BLOCKS

Everything else stays on exactly the day and time the client has already seen.

1 Valle de la Muerte moves from 13:30 to 15:30

The itinerary had it from 13:30 to 15:30, exactly when Puritama ends. The springs are some 30 km from San Pedro: you cannot finish there at 13:30 and be in the valley at 13:30.

The afternoon of the 24th already had a free slot from 15:30 to 17:30, so the excursion fits there without touching anything else in the day. It also takes the sandboarding out of the hottest hour and leaves two and a half hours of rest before the Christmas Eve dinner.

2 Cejar goes into the afternoon of the 23rd

Cejar was quoted and did not appear in the itinerary, and the client asked precisely whether the walk could be combined with a float. This is the float.

It does not fit on the 24th: if Cejar takes the afternoon, Valle de la Muerte has no slot and the 13:30 clash comes back. The afternoon of the 23rd is the only gap where it fits whole, between the acclimatization ending at 13:00 and Valle de la Luna starting at 17:30. In its favour: Cejar sits at salt-flat level, so it does not undo the day's acclimatization.

3 Check-out on the 26th happens before leaving for Quito

This is not a time change, it is a new half-hour block first thing. Without it, between Quito ending at 10:00 and the transfer leaving at 10:24 you have to come back from the pukará, stop at the hotel, check out and load luggage in 24 minutes.

With the luggage already in the vehicle, the transfer leaves straight from the pukará and the morning stops being on a knife edge.

THE FULL DAY, HOUR BY HOUR

The 10 highlighted blocks are the services we operate. The rest — flights, meals, check-in and free time — are in grey, purely so the whole day is visible and every time makes sense in context.

UNCHANGED

WEDNESDAY 23 DECEMBER

Acclimatization, salt flat and sunset

2 services of ours

09:00
13:00

Acclimatization · calm morning in San Pedro

Still to define whether they want it guided or as free time. If guided, we quote it.

UNCHANGED

13:30
16:30

Cejar Lagoon + Ojos de Tebenquiche + Tebenquiche Lagoon

A **three-hour version, without waiting for sunset at Tebenquiche**: they get sunset that same afternoon at Valle de la Luna. It is the only gap in the programme where Cejar fits whole. Back at the hotel 16:30, an hour before the next pickup.

NEW

17:30
20:45

Valle de la Luna at sunset

Please confirm that a 17:30 start allows the **off-circuit route through El Vallecito**, which is walked, rather than the standard circuit.

UNCHANGED

THURSDAY 24 DECEMBER

Puritama, Valle de la Muerte and Christmas Eve

3 services of ours

09:30
13:30

Puritama Hot Springs · 3,500 m

Kept on the 24th rather than the 23rd: it leaves a day acclimatizing in San Pedro at 2,400 m before climbing, with Miscanti above 4,000 m the next day.

UNCHANGED

13:30
15:15

Back to San Pedro, lunch and rest

This gap did not exist before: Puritama and Valle de la Muerte were back to back at 13:30, with the springs some 30 km away.

15:30
17:30

Valle de la Muerte · sandboarding

It was 13:30 to 15:30, impossible back to back with Puritama. It moves into the slot the itinerary had as a free afternoon, and in doing so leaves the hottest part of a December day.

WHAT WE NEED YOU TO CONFIRM

In order of urgency. The first two govern how the whole thing is built.

- 1 Availability and holiday supplement for 24 and 25 December.**
Christmas Eve and Christmas Day, with the altiplano full day on the 25th. This is the first thing we need to close: if the 25th cannot operate, the whole trip has to be rebuilt.
- 2 Can you run Cejar on the 23rd from 13:30 to 16:30, in a three-hour version?**
Without waiting for sunset at Tebenquiche. If you need the four hours quoted, tell us: the only way to give them is to shift that day's Valle de la Luna, which the client has already signed off.
- 3 Can you move Valle de la Muerte to 15:30-17:30 on the 24th?**
Does sandboarding work at that hour, or would you recommend another slot?

4 Quad bikes: do you operate them?

The client asked for them as an alternative to sandboarding. Sandboarding is quoted; quad bikes are not. If you do not run them, who do you coordinate with?

5 Astronomy on the 24th: the moon is full.

On the night of the 24th the moon is close to 99% illuminated, and no other night of the trip is better — from the 22nd to the 26th it runs between 92% and 100%. How do you handle that on a private tour? Is it still worth it, aimed at the moon and planets?

6 Astronomy pickup at the restaurant at 22:10.

The Christmas Eve dinner ends at 22:00 and the tour starts at 22:15. Please confirm the exact pickup point.

7 Valle de la Luna on the 23rd starting at 17:30.

Is that enough for the off-circuit route through El Vallecito, which is walked? That is the one quoted.

8 Full day on the 25th: scope and entrance fees.

Chaxa comes in and Tuyajto and the proto-villages drop out compared with the quote. How does the price land, and which tickets have to be bought in advance?

9 Quito on the 26th in ninety minutes.

It is quoted at two hours. Does the guided route fit 08:30–10:00, or should we start at 08:15?

10 Rates for 4 travellers and the full-day vehicle.

The trekking alternatives were quoted as a minimum group rate for 2. And for the altiplano full day, with 4 travellers plus guide-driver and luggage, which vehicle would you assign?

We look forward to closing the times and holding the spaces.
